Summary

- AI Engineer with 3+ years of experience building production-grade AI systems and scalable backend architectures.
- Specialized in LLM engineering across OpenAI and open-source models, including structured generation and evaluation workflows.
- Hands-on expertise in designing agentic systems using LangGraph, tool-augmented reasoning, and automation pipelines with n8n and Make.com.
- Strong backend foundation in Python and FastAPI, building high-performance APIs and scalable data pipelines.
- Experienced in cloud deployment, Dockerized environments, and end-to-end system design for reliable, production-ready AI solutions.

Areas of Expertise

- Agentic AI
- LLM Engineering
- Data Analytics
- Backend Development
- DevOps
- AI Automation

Professional Experience

AI Engineer

NecessaryPulse.com (owned by necessary.vc) · Remote · Dec 2025 – Present

- Built AI-driven pipelines to analyze and structure startup and investment data for a US-based VC firm.
- Developed intelligent scraping, parsing, and enrichment workflows for lead generation and insights.
- Designed LLM-based systems for data extraction, scoring, and automated research workflows.

AI Engineer

Traiveller.ai – AI-Powered Travel Agent · Remote · Nov 2025 – Mar 2026

- Developed AI-powered travel workflows, including recommendation systems and dynamic itinerary generation.
- Built backend services and integrated LLMs for personalized user experiences and real-time data handling.
- Worked on automation pipelines and scalable APIs to support AI-driven travel planning features.

Cofounder

WriteWisely.ai – Undetectable AI Writer · Remote · Oct 2024 – Dec 2025

- Built WriteWisely's AI engine for undetectable, high-quality, citation-ready content.
- Led backend development using FastAPI, Docker, and AI detection integrations.
- Defined product vision and executed growth-focused, user-driven strategy.

Backend Engineer

Eduwriter.ai – AI-Powered Writing Assistant · Remote · Jun 2024 – Aug 2025

- Developed the backend codebase for Eduwriter's Essay Writer tool, focusing on API routes and integrations with OpenAI and Grok.
- Coordinated testing and validation, ensuring compliance with industry standards.
- Led LLM engineering for Academic Writing and Humanizing tools.

Projects

CV hosting on AWS (this site)

Private S3 bucket served two ways: Apache on EC2 with a scheduled sync, and a Lambda function URL. Least-privilege IAM roles, no access keys.

Education

BS Software Engineering

FAST NUCES, Lahore · Aug 2023 – Jun 2027

Additional Information

Certifications

- Data Analysis with Python
- Introduction to Python

Activities & Languages

- Languages: Urdu, English
- Code with Geeks – YouTube Channel

Hosted on: AWS
